DETAILED ACTION

Claims 1, 2, 4-10 are pending in this application and were examined on their merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/04/07 has been entered.

The objection to Claim 4 due to minor informalities has been withdrawn due to the Applicant's amendments to the Claims filed 04/04/07.

The rejection of Claim 8 under 35 U.S.C. § 112, 2nd paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention has been withdrawn due to the Applicant's amendments to the Claims filed 04/04/07.

Claim Rejections - 35 USC § 102

Claims 1, 4 and 6-8 remain rejected under 35 U.S.C. § 102(b) as being anticipated by Kovacs-Hadady *et al.* (1998) for reasons for record set forth in the Action mailed 01/04/07.

Claim Rejections - 35 USC § 103

Claims 1, 2, 4, 6-8 and 10 remain rejected under 35 U.S.C. § 103(a) as being unpatentable over Kovacs-Hadady *et al.* (1998) in view of Park *et al.* (US 6,316,669 B1) for reasons for record set forth in the Action mailed 01/04/07.

Claims 1 and 4-10 remain rejected under 35 U.S.C. § 103(a) as being unpatentable over Kovacs-Hadady *et al.* (1998) in view of Horonick *et al.* (US 3,678,151) for reasons for record set forth in the Action mailed 01/04/07.

Response to Arguments

Applicant's arguments filed 04/04/07 have been fully considered but they are not persuasive.

The Applicant argues that the amendment to Claim 1 wherein the detector is described as capable of detecting a change in the spectrum of a solution comprising a complex formed by a probe molecule and an agent, wherein the solution has a pH greater than 5 and that this pH optimum is distinct from that of the Kovacs-Hadady *et al.* reference which does not teach or suggest the present invention (Remarks; Pg. 4, Lines 12-23 and Pg. 5, Lines 1-7) and that the combination of references in view of Kovacs-Hadady *et al.* does not then teach all the limitations of the claimed invention (Remarks, Pg. 5, Lines 8-18).

This is not found to be persuasive for the following, the newly added language to Claim 1 is of a functional nature and does not materially change the system as claimed, which comprises: a probe molecule, an agent, a source of light radiation and a detector. The new language does not constitute a new limitation, merely that the detector itself *be capable* of detecting a change in the spectrum of a solution comprising a complex formed by a probe molecule and an agent, wherein the solution has a pH greater than 5.

Barring any evidence to the contrary, there is no reason to believe that the Hewlett-Packard 8453 diode-array spectrophotometer disclosed by Kovacs-Hadady *et al.* would not be able to detect a change in the spectrum of a solution comprising a complex formed by a probe molecule and an agent, wherein the solution has a pH greater than 5. Further, Kovacs-Hadady *et al.* specifically teaches a method wherein the change in the spectrum of a solution comprising a complex formed by Eosin-Y and Benzalkonium Chloride, wherein the solution has a pH of 9.62 (Fig. 1).

Conclusion

No Claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
